About

marketing.

I've built Python/SQL ETL pipelines integrating data from at least 10 MySQL databases and implemented production Apache Airflow orchestration. I introduced dbt at Admirals and later built a BigQuery/dbt analytics stack at Estateguru. There, I established analytics engineering practices to improve data quality and delivery reliability, using dbt tests, source-freshness checks, documentation, lineage, and Git workflows with Slim CI.

My analytical work spans experimentation, funnel and customer analysis, segmentation, predictive lead scoring, and marketing mix modeling.

At Estateguru, explainable borrower-risk models helped reviewers prioritize application issues. Weekly comparisons of similarly complex applications showed average loan approval time was 50% lower than under the previous 2–3-day manual process. At Admirals, the first sign-up scoring rollout reduced average sales workload by at least 70% across five regions.

My independent project, Toronto Housing Bottleneck Analytics, uses City of Toronto building-permit data to examine active-permit aging and cleared-permit lifecycle durations. I implemented reproducible ingestion and SCD Type 2 revision history, developed tested dbt data products with model contracts, and automated data publication and dbt documentation for a live Streamlit dashboard.

I've also designed and presented at least 10 Power BI and Tableau dashboards, communicated web, customer, and marketing-performance findings to stakeholders, and trained teams on GA4 and related tools.

I'm seeking full-time opportunities as an Analytics Engineer or Data Analyst.

Experience

Career Break & Relocation

Self Employed

Dec 2022 - Mar 2025 · 2 years 4 months

India

• Took a career break to provide family care after leaving Estonia in December 2022, then relocated to Canada in March 2025.

Aug 2022 - Oct 2022 · 3 months

Tallinn, Harjumaa, Estonia

• Built ETL scripts to integrate data from disparate sources, documented data processes in an internal knowledge base, and trained stakeholders on data-related workflows.

• Delivered internal and client-facing KPI dashboards and marketing performance reporting, with ad hoc B2B analysis across demand generation, media performance, SEO, and revenue attribution.

Data Lead (Consulting Engagement)

Estateguru.co

Dec 2021 - Apr 2022 · 5 months

Tallinn, Harjumaa, Estonia

• Built a foundational analytics stack, integrating source data into BigQuery through Stitch and custom ELT; developed dbt/SQL transformations and incremental models around a star-schema design.

• Established analytics engineering practices to improve data quality and delivery reliability, including dbt tests, source-freshness checks, documentation, lineage, Git workflows, and Slim CI. Delivered Tableau and Power BI reporting to cross-functional stakeholders.

• Developed and...

Admirals

1 year 11 months

Tallinn, Harjumaa, Estonia

• Took the sign-up lead-scoring MVP into production across five regions. The first rollout reduced average sales workload by at least 70%, improved conversion through better-targeted service, and enabled daily marketing feedback instead of biweekly or monthly updates. In a later automated-conversion rollout, only borderline-probability sign-ups (approximately 10% of all sign-ups) were routed to sales for manual follow-up, reducing the volume requiring sales attention by approximately...

Web/Marketing Data Analyst

Aug 2019 - Jan 2020 · 6 months

Tallinn, Harjumaa, Estonia

• Worked with stakeholders to develop a sign-up lead-scoring MVP. Its promising results and positive stakeholder response secured approval for production rollout and led to promotion to Data Scientist.

• Built BigQuery SQL and dbt transformations to prepare marketing and web analytics data for KPI reporting; developed churn-propensity and lifetime-value (LTV) models, and conducted customer segmentation and marketing mix modeling.

• Designed and presented at least 10 Power BI and...

Self-Employed

Jan 2017 - Jul 2019 · 2 years 7 months

Undertook intermittent, project based work in machine learning and customer analytics alongside other professional roles.

- Built the initial version of a hotel recommendation system for Six Travels mobile app using the limited data available at the time.
- Developed customer segmentation and customer lifetime-value prediction solutions for a financial institution.
- Developed machine learning functionality for Averto, an app providing alerts related to high-risk countries.

Data Analyst

Wise

Oct 2018 - Mar 2019 · 6 months

Tallinn, Harjumaa, Estonia

• Proposed, implemented, and presented an internal fraud-as-a-service MVP to stakeholders.

• Analyzed fraud cases to identify emerging patterns and collaborated with the fraud data scientist to incorporate findings into the fraud service; provided SQL training to colleagues interested in analytics.

Creditstar Group

Mar 2017 - Oct 2017 · 8 months

Tallinn, Harjumaa, Estonia

• Built Python/SQL ETL pipelines and transformations integrating data from at least 10 MySQL databases; scraped external sources to compile competitor benchmarks.

• Proposed and led the production implementation of Apache Airflow to orchestrate data workflows, improving automation and efficiency.

• Developed and deployed machine learning models for financial fraud detection across seven European markets and built a customer analytics framework.

• Built Tableau dashboards...

Senior Research Fellow

Indian Institute of Technology, Mandi

Sep 2013 - May 2014 · 9 months

Mandi, Himachal Pradesh, India

• Developed machine-learning and probabilistic models for text-to-speech in Indian languages. Created a Rajasthani font and trained a custom OCR model to extract text from PDFs, expanding training data and improving text-to-speech model accuracy by 20%.

Amdocs

Aug 2010 - Jul 2013 · 3 years

Limassol, Cyprus

• Developed, maintained, enhanced, and ported internal integration tools supporting telecommunications billing, CRM, and partner relationship management systems using Java, Python, SQL, Perl, and Linux shell scripts.

• Wrote and optimized SQL scripts using complex joins and window functions to debug and resolve pre- and post-production issues; learned new tools independently and trained teammates.

Projects

Toronto Housing Bottleneck Analytics

Sep 2026 - Present

Built an end-to-end analytics product using City of Toronto building-permit data to examine active-permit aging, cleared-permit lifecycle durations, and source-data reliability.

Implemented reproducible Python/dlt ingestion into DuckDB with Parquet snapshots and SCD Type 2 permit-revision history. Developed dbt models and analytical marts with data-quality tests, model contracts, source-freshness checks, and reconciliation. Automated CI/CD publication of data artifacts and hosted dbt...
